Chat to Invoice — Solana

Best Consumer App on Solana

Custom orders change in chat

Seller

“Small cups are $1, medium $2, and large $3.”

“Logo printing adds $0.10 per cup.”

Buyer

“I’ll take 50 small, 20 medium, and 30 large.
Add logo printing to all 100 cups.”

Illustrative dialogue based on the demo order.

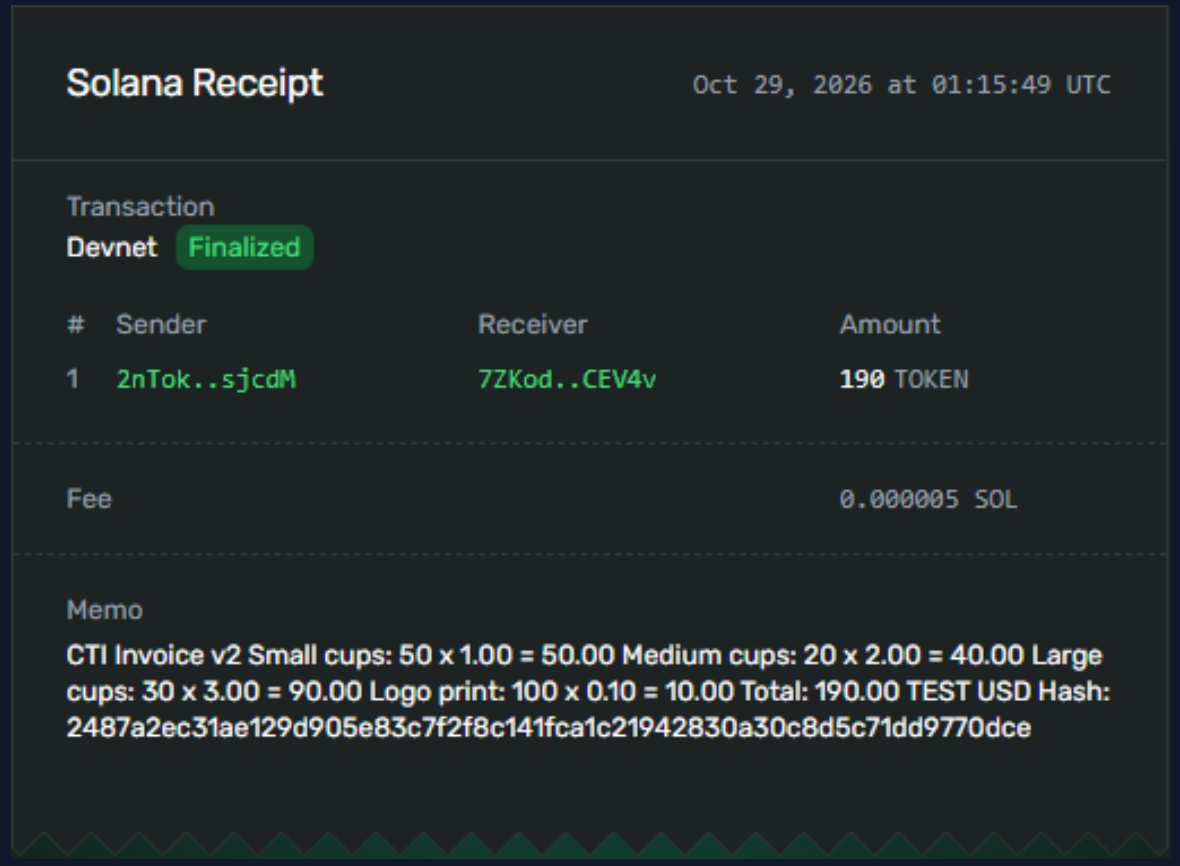

Both parties confirm one statement

AI extracts the terms and links them to the original messages.

The app calculates the total. Both parties review the same version.

Item	Quantity	Unit (USD)	Subtotal (USD)
Small cups	50	1.00	50.00
Medium cups	20	2.00	40.00
Large cups	30	3.00	90.00
Logo printing	100	0.10	10.00
Agreed total			**190.00**

A finalized Solana Devnet payment

Original Explorer receipt

190 TEST USD

Custom test token with no monetary value.

CTI Invoice v2
Small cups: 50 x 1.00 = 50.00
Medium cups: 20 x 2.00 = 40.00
Large cups: 30 x 3.00 = 90.00
Logo print: 100 x 0.10 = 10.00
Total: 190.00 TEST USD

The app checks the recipient, token mint, amount, and exact Memo after finalization.
